Certifications

- IAAP Certified Professional in Accessibility Core Competencies (CPACC)

Experience

Assistant VP, Software Engineer II

Bank of America — Charlotte, NC
Feb 2020 – Present

- Collaborate closely with UX, business analysts, accessibility specialists, and external teams to clarify requirements, align expectations, and deliver world-class, accessible, scalable software.
- Contribute to a department-wide Accessibility Center of Excellence and lead integration of accessibility best practices.
- Spearhead front-end development for multiple large-scale projects.
- Document legacy C# (.NET 4.8) projects and implement modern Java-based replacements.
- Assess and interview candidates for developer roles.
- Mentor junior developers to increase productivity and code quality.
- Work daily with teammates scattered across the the US and the world.
- Build testing responders using NodeJS, Express, TypeScript. Ultimately these replicate the back end logic from production back end, without database connectivity.

Instructional Staff

2U/EdX — Remote
Apr 2019 – Dec 2024

- Taught full-stack web development for Penn LPS and University of Connecticut coding boot-camps.

- Instructed cohorts of 30+ students using HTML, CSS, JavaScript/TypeScript, NodeJS, React/Redux, SQL, MongoDB, and GraphQL.
- Maintained an 80%+ graduation rate and received consistently high ratings from students and administrators.

Sr. Automation Engineer

Windstream — Charlotte, NC
Sep 2008 – Feb 2020

- Built internal full-stack apps and automation tools for billing, order entry, and service workflows.
- **Generated over $4M/year in labor cost savings and $3M/year in revenue recovery via audits and automation.**
- Designed SQL reporting pipelines to support automated business processes.
- Tech "Stack": AutoIt, SQLite, GeckoDriver, DB2, Business Objects

Supervisor / Business Analyst

Windstream — Charlotte, NC *Sep 2012 – May 2015*

- Collaborate with other Supervisors to guide a large department through uncertain times with frequent changes of higher leadership, including extended periods of time without it entirely.
- Lead a team of 12 Front-line employees through daily activities. Including regular stand-up meetings, work onboarding, and status reporting.
- Train team members in the use, and maintenance of automation tools.
- Create documentation for processes and tools used department-wide.
- Teach team members about process analysis for the purpose of new project intake and automation.

Education

- **UNC Charlotte** — Full Stack Web Development Bootcamp, 2018
- **Wingate University** — B.S. Psychology, 2005
